

FLYING FOX PAPER JET INSTRUCTIONS

Getting Started

Orient the template so that the “UP” arrow is at the top of the page. Then flip the paper over so that none of the fold lines are showing.

Fold 1

Fold the top left corner down toward you until fold line 1 becomes visible, then crease the page along that fold line.

Repeat with the top right corner.

Fold 2

Fold the left side over again and crease along fold line 2.

Repeat with the right side.

Fold 3

Fold the nose down and toward you and crease along fold line 3.

Fold 4

Fold the plane in half along fold line 4.

(Make sure the outside edges of the wings line up.)

Fold 5

Fold both wings down and crease along fold lines 5.

Fold 6

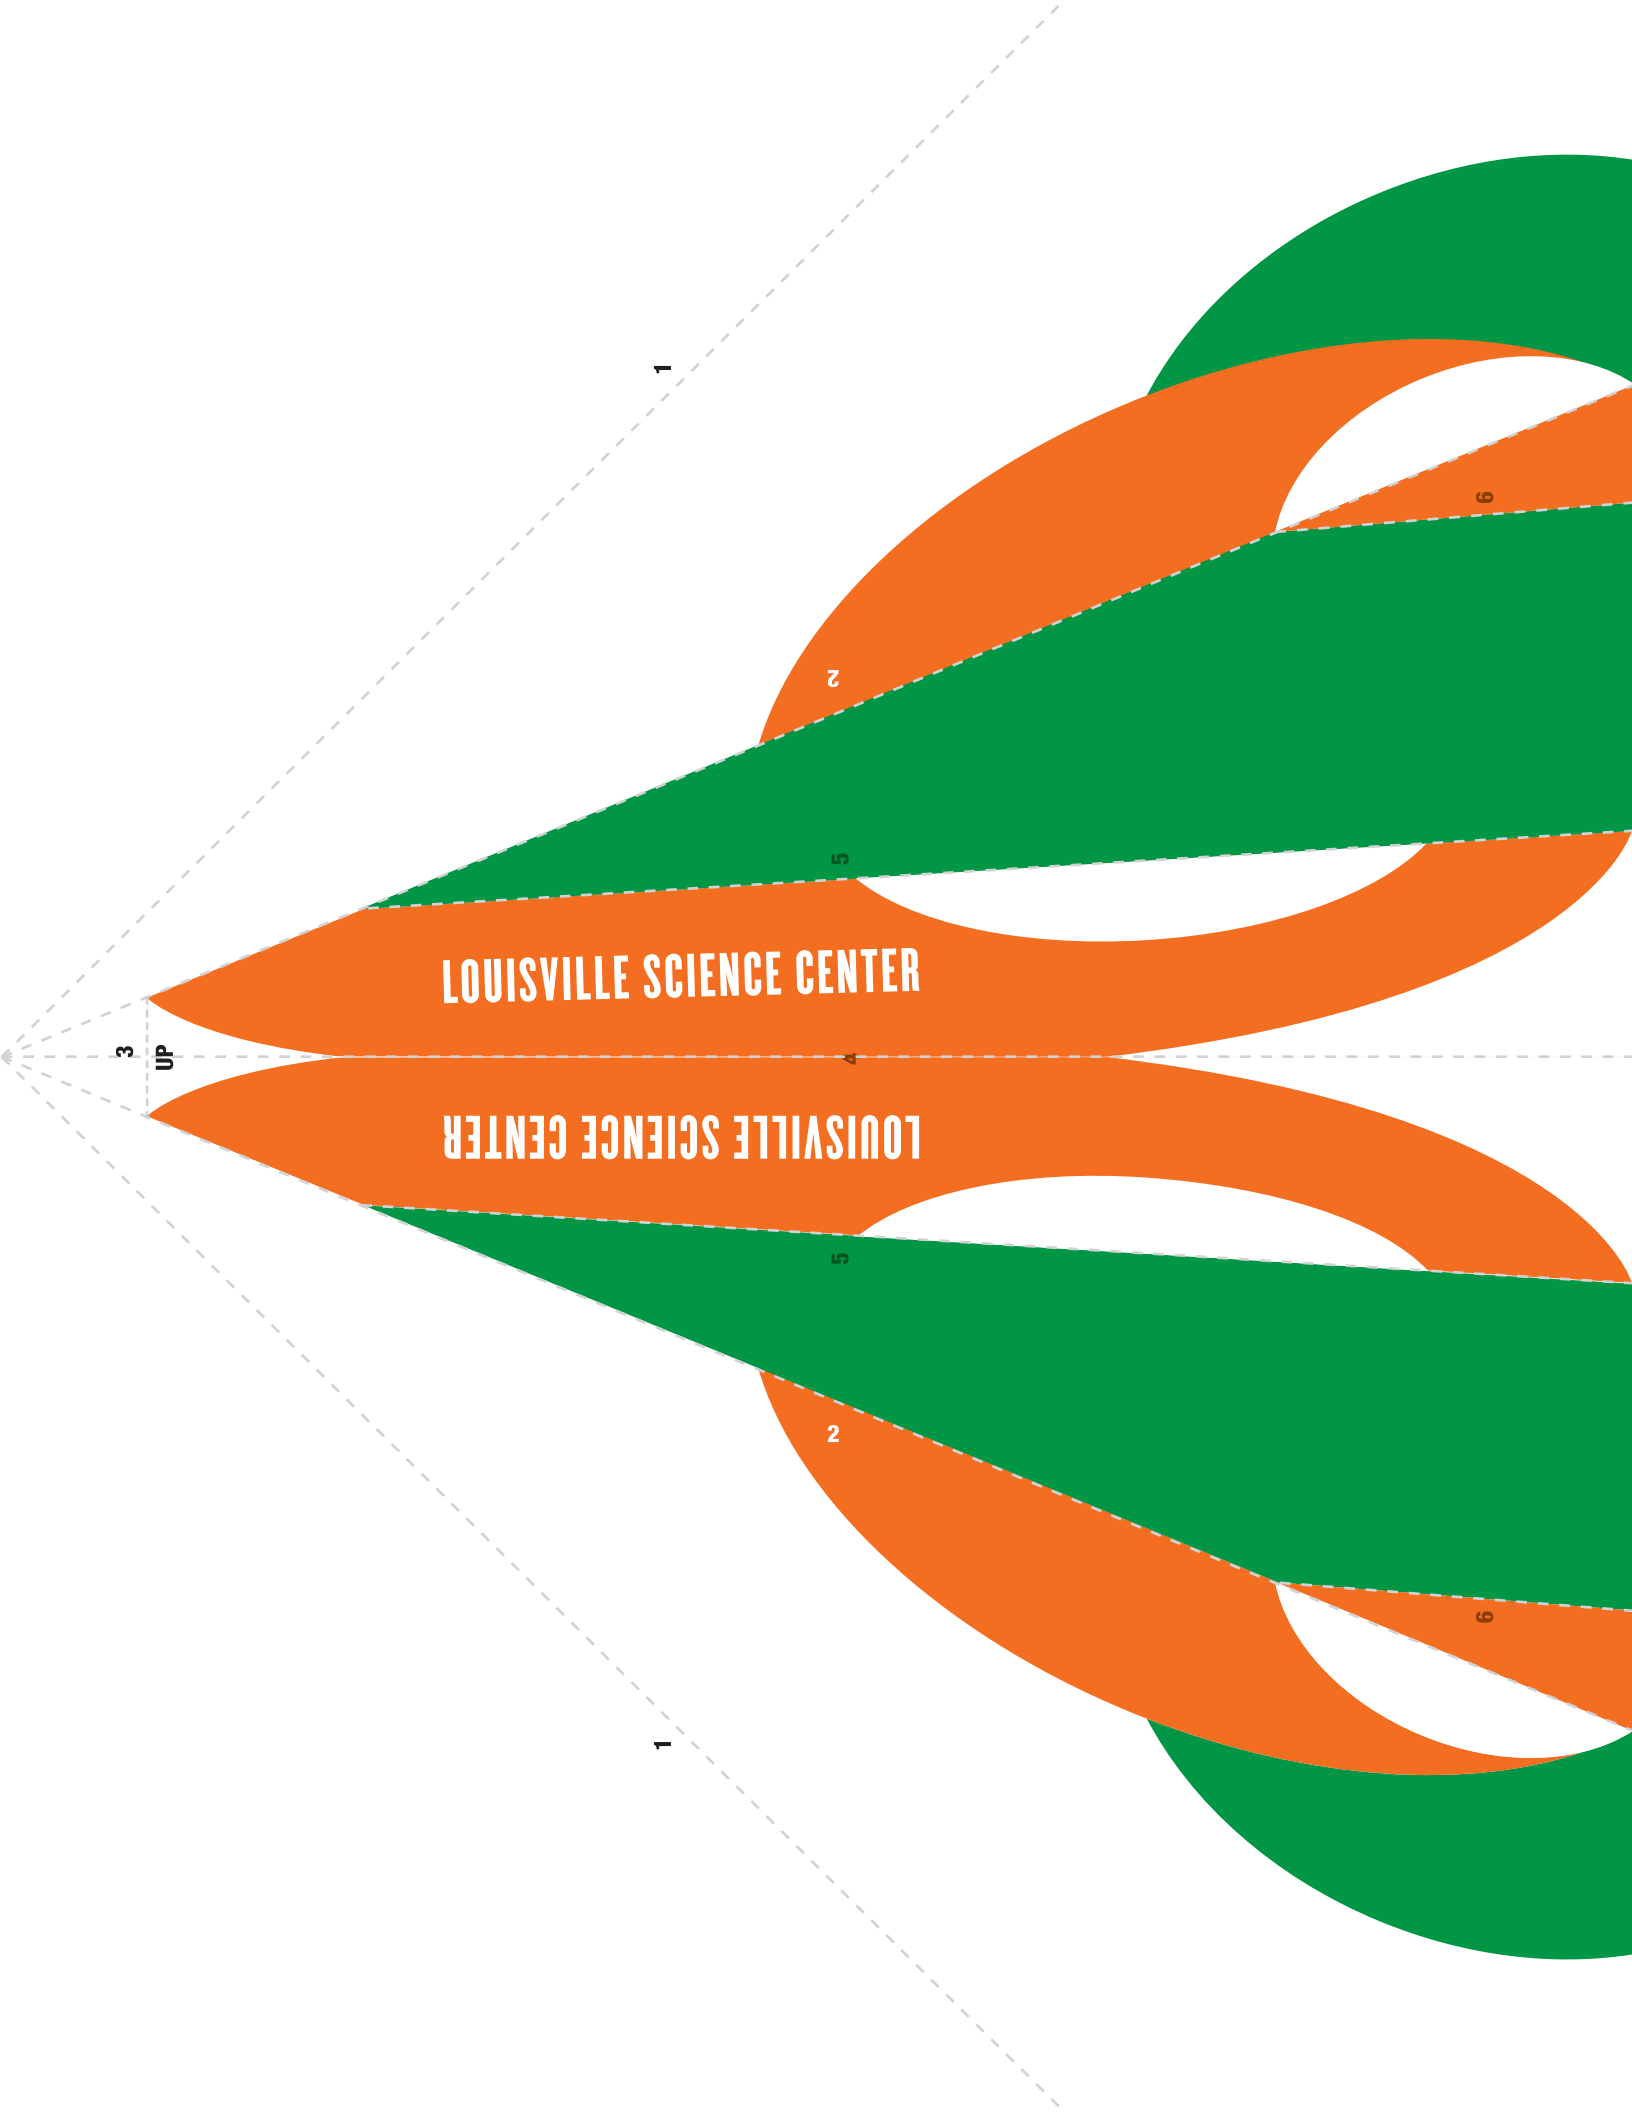

Fold the winglets up along fold lines 6.

Prepare for Take Off

Tilt the wings up slightly (away from the body of the jet), so they form a “V” shape when viewed from the front.

Aim high!

Upload pictures of you and your plane to our Facebook fan page. Type Louisville Science Center in the search box and become a fan.
